

BUSINESS CHECKING PROMOTIONS

Objectives & governance

Prepared for the business banking leadership review · November 2025 · Business Banking Product Operations

WHY DATED PROMOTIONS

Promotions concentrate attention — they never create exceptions. Every campaign carries an owner, an effective window, and a fit-first guardrail.

A promotion that outlives its window becomes a support problem; a dated record never does.

NOVEMBER 2025 CAMPAIGN

The November 2025 business checking promotion is designed to increase adoption of the bank's startup and premium business offerings.

OCTOBER 2025 CAMPAIGN

The October 2025 business checking promotion is designed to increase adoption of the bank's premium and eco-conscious business offerings.

GUARDRAILS

Fit before placement

A promoted account is recommended only when it meets everything the customer asked for.

Dated windows, dated records

Each campaign resolves to one dated final document; the contact date decides which one applies.

Records index

Historical material stays searchable through the dated records index and is never quotable as current terms.

MEASUREMENT & REVIEW

Owners review campaign health weekly during the window and close each campaign with a dated retro.

Retros feed the next campaign's candidate list; they do not amend a closed record.
