World Blue Treasury Setup Guide

Issue	RB-WBL-04	Effective date	2025-09-15
Supersedes	None — first issue	Owner	International Banking Operations
Applies to	World Blue business checking — treasury setup and early operations. This guide states procedure and operating guidance; normative pricing terms for World Blue are stated in the Business Pricing & Terms Exhibit (RB-PRC series).		

1. Before you begin — pre-start confirmations

- Confirm the ability to maintain at least \$10,000 across currencies to keep the account in good standing.
- Decide which of the up to 35 supported currencies the customer plans to hold and transact in.
- Verify that intended counterparties and destinations are within the \$140 supported regions for sending and receiving payments.

2. Initial setup

Initial setup covers, in order:

1. Funding the account so the customer can meet ongoing balance needs.
2. Adding the currency wallets the customer will use for operations and settlements.
3. Setting a primary operating currency for reporting and reconciliation.
4. Configuring payee profiles for frequent counterparties within the supported regions.
5. Reviewing user access and preparing to assign permissions based on roles and responsibilities.

3. Operating guidance

- Keep an operating buffer above \$10,000 to avoid service interruptions.
- Start with a small set of currency wallets and expand as payment flows stabilize.
- Validate a test payment to a known counterparty in one of the supported regions and confirm posting and reconciliation.
- Set alerts and reports aligned to the treasury cadence to monitor balances and activity.
