Beige Enterprise Treasury Onboarding Runbook

Issue	RB-BGE-05	Effective date	2025-09-29
Supersedes	None — first issue	Owner	Enterprise Treasury Onboarding
Applies to	Beige enterprise treasury accounts — onboarding through first statement close. This runbook states procedure; normative pricing terms for Beige (minimum balance, monthly maintenance fee, waiver threshold) are stated in the Business Pricing & Terms Exhibit (RB-PRC series).		

1. Pre-onboarding

- Before initiating Beige onboarding, confirm executive sponsorship and authorized signers.
- Prepare onboarding documentation, treasury policy, and internal approval matrix.
- Identify primary funding sources for initial deposits and recurring cash flows.

2. Funding and balance planning

- If the customer anticipates balance variability during early implementation, align funding schedules to preserve eligibility for the fee waiver threshold.
- If the customer plans to stagger incoming funds across multiple institutions, configure conservative payment windows and internal approvals to avoid negative balances.

3. Account team and operating cadence

- A Beige customer is assigned 2 dedicated account managers who coordinate onboarding milestones, entitlements, and operational readiness.
- Establish a recurring operating cadence with the account team for progress tracking and rapid issue resolution.

4. Operational readiness checklist

1. Set signer roles and entitlements consistent with the treasury policy.
2. Add internal approval rules for payments and administrative changes in line with the governance model.
3. Validate statement delivery preferences, reporting formats, and reconciliation identifiers prior to first close.
4. Confirm funding sources are scheduled to achieve at least \$250,000 and, if desired, the waiver threshold of \$500,000.
