Double Cash Back Concept Review

Version 1.4 · 2024-10-03 · Planning material, not customer terms
Prepared by: A. Fuentes, Payments Product · For: growth planning session 2024-10-07

THE ASK

3×

Triple cash back for the first six months

Proposal: new Business Silver customers earn triple the standard rates on all purchases for six months, on an opt-in basis at account opening. Aggressive enough to headline the Q4 business-banking push; opt-in keeps finance exposure bounded to enrolled accounts.

PROPOSED WINDOW

Campaign shape (working)

Twelve-month acquisition window. Enrollment form at account opening; rate boost applies from first statement after enrollment is confirmed. All dates pending finance and compliance review.

COST SKETCH

Finance exposure, three multiplier scenarios

SCENARIO	MULTIPLIER	12-MO PROMO COST (EST.)	BREAK-EVEN SPEND LIFT
Concept (this deck)	3×	\$4.9M	+31%
Fallback A	2.5×	\$3.6M	+22%
Fallback B	2×	\$2.4M	+14%

October model run, acquisition mix held flat. Numbers are planning estimates; nothing here is a customer commitment.

OPEN QUESTIONS

What this draft does not settle

Multiplier

Finance flagged the 3× cost line at the September pre-read; 2× fallback modeled but not recommended in this draft.

Opt-in vs automatic

Legal prefers automatic application if we can bound the cost; the enrollment form adds a drop-off step nobody likes.

Exclusion handling

Whether promoted rates interact with the merchant exclusions list at all, and how the contact center would explain it, is unresolved in this draft.

Window anchor

Six months from opening vs. six months from enrollment confirmation — needs a decision before terms drafting.

NEXT STEPS

Path to a final terms deck

2024-10-07

Growth planning session — multiplier and enrollment decisions requested.

Mid-October

Finance re-run at the chosen multiplier; compliance pre-read of draft terms.

Early November

Final terms deck to approval; creative and contact-center briefing follow the approved version.

Supersession and approval get recorded on the program terms deck and in the dated program records, not on this file.
