

ATM Network — Q3 2025 Performance Readout

Fleet, vendor, and servicing-cost review for July–September. Operational readout — program terms and fee policy live with their owners.

Prepared by: T. Brzezinski (Finance) with D. Reeves (Support Floor Operations)

Presented: October 16, 2025 · Distribution: ops leads, finance, program operations

Volume

1.92M

withdrawals across the quarter,
+4.1% vs Q2

66%

on-us share — down two points,
third straight quarterly decline

\$142

average dispense, flat

11.4%

of foreign withdrawals occurred
abroad, August peak

The on-us slide is the quarter's real story: usage is migrating to other operators' machines faster than the fleet plan assumed.

Fleet health

MEASURE	Q3	Q2	COMMENT
Fleet uptime	99.1%	99.3%	Two multi-day outages, both power-related
Mean time to repair	9.2 hrs	8.1 hrs	Northgate technician coverage gap in the northeast
Cash-out events	31	26	Holiday-weekend forecasting misses
Worst unit	5th St branch recycler	—	Three jams; on the replacement list for Q4

Vendor cost

WHERE THE MONEY WENT

Field servicing (Northgate Field Services): \$0.87 per on-us transaction, up from \$0.81 — the new armored-courier rates landed mid-quarter.
Locator data license (GridPin): flat fee, renewal due March 2026; data-quality credits under discussion after the northeast feed gaps.

- Northgate invoice disputes open at quarter close: three, all northeast, all technician-dispatch billing.
- Interchange paid to other operators tracked the on-us decline — every point of on-us share we lose shows up on this line.
- Q4 watch: recycler replacement capex vs the jam-driven dispatch spend it retires.

Servicing & make-good spend

\$391K

total rebate and credit spend booked in Q3, all checking programs combined (accounting view)

-8%

fee-complaint contact volume vs Q2, first decline this year

63

October locator-complaint tickets already tagged — Q4 risk flag, not a Q3 number

Program-level parameters and eligibility are Program Operations' record, not this readout — the figure above is a cost roll-up and reconciles to the accrual memo, nothing more.

Watch items for Q4

- GridPin northeast feed: vendor promises the fix in the November monthly drop; ticket GP-4471 stays open until we see it.
- On-us share: fleet plan refresh due to the January capital review if the slide continues.
- Recycler replacement, 5th St branch: order placed, install window December.
- Rebate-program cost tracking moves to a monthly cut at Finance's request — first monthly memo covered October.

Questions on the numbers: T. Brzezinski. Questions on the floor impact: D. Reeves.
