

CLOSURE & RETENTION RUNBOOK

DOCUMENT	Controlled Document RB-CR-114
OWNER	Marta Villanueva, Retention Operations
ISSUED	2025-10-06
AMENDMENTS	Amendments are recorded in Amendments Log AL-CR-114.

1. PURPOSE AND SCOPE

This runbook governs servicing work on credit card closure requests, retention handling, downgrades, and the account credits that support them. It applies to all Retention Operations agents. Call sequencing is worked from the desk boards (RET-OPS-301 through RET-OPS-304); the standing servicing rules are kept here.

2. CLOSURE ELIGIBILITY

An account must pass every check below before closure is initiated. Run the checks in the order desk board RET-OPS-301 presents them.

2.1 Balance. Balance disposition at closure is worked per the current desk ruling - see the closures clinic notes. Do not improvise it from this page.

2.2 Disputes. Confirm there are no pending disputes on the account; pending disputes allowed is No.

2.3 Account age. Confirm the account has been open at least 60 days.

2.4 Replacement cards. Confirm there are no pending replacement cards on the account.

Do not initiate closure while any check fails.

3. POST-CLOSURE COMMUNICATIONS

Set expectations before wrap-up: the customer will receive a confirmation email and a final statement within several business days. Confirm the email address on file.

4. REDEMPTION AND REFUND WINDOWS

When closure proceeds under the retention protocol, and after any closure request if the customer asks, cover the rewards-redemption window and, where an annual fee posted recently, the annual-fee refund window.

The rewards-redemption and annual-fee refund windows are maintained in the amendments log.

Quote both windows from the latest dated entry.

Ref: Amendments Log AL-CR-114

5. DOWNGRADE EFFECTS

Explain the effects before processing a downgrade.

5.1 The credit limit, account number, and account history are preserved.

5.2 Unredeemed rewards points transfer at the same value.

5.3 A downgrade takes effect immediately; the customer continues using the existing physical card until the new card arrives, typically within several business days.

5.4 If an annual fee was paid recently before the downgrade, the customer may be eligible for a prorated refund.

6. STATEMENT CREDITS

When a statement credit is needed for goodwill adjustments, promotional credits, fee reversals, or other account credits, use `apply_statement_credit_8472`.

Parameter signatures for the tool are published in contract pack CP-CARD-7.

7. VERIFICATION

After `apply_statement_credit_8472` is called, verify the credit appears as a negative transaction in the customer's credit card transaction history and reduces the statement balance.
