

EcoCard — Sustainability Points Program Guide

Document RB-PG-207 · **Version 2.4 — review copy** · Circulated for review 2025-10-24 · Owner: Personal Cards Product (M. Chen)
· Reviewers: Compliance (T. Nguyen), Finance, Sustainability Program Office

Review draft. Proposed changes against v2.3 are concentrated in Section 1 (certified-partner pilot rate) and Section 2 (partner directory link). Pricing sign-off for the pilot rate is pending with Finance. Comments to the document owner.

1. Earning rates (proposed)

- Certified-partner pilot: Earn \$6.00 sustainability points per dollar spent at pilot-designated certified green partners.
- Green purchases outside the pilot: Earn \$5.00 sustainability points per dollar spent at qualifying green merchants and categories.
- Other purchases: Earn \$1.00 sustainability points per dollar.

2. How to maximize green earnings

- Use your card at certified green partners and eco-friendly categories (e.g., public transit, EV charging, renewable energy subscriptions) to receive the higher earn rate.
- When shopping online, check that the merchant is listed as a qualifying green merchant before checkout. A partner directory link is proposed for the app rewards view.

3. Tips to ensure you earn correctly

- Keep transactions separate: If a cart mixes green and non-green items at a non-partner merchant, the entire purchase may earn at the non-green rate.
- Save receipts for any purchases you believe should qualify as green; this helps in resolving any earn-rate disputes.
- If a transaction is returned or refunded, the corresponding points will be reversed at the original earn rate.
