1. OVERVIEW

The Green Account (savings) is the sustainability-positioned savings product, carried into the Product Configuration Register from the legacy Green product line with its marketing name unchanged. Two product features are stored on the register node itself rather than in the fee schedule: the statement-delivery terms, which the register holds as a program attribute quoted from the Green savings program supplement (current print), and the Green Account (savings) debit card, which is made from recycled ocean plastic.
