Boost Bonanza

Concept deck · 2025-09-08 · For product and rate-operations reaction
Prepared by Growth Marketing (T. Brooks) · Not costed, not legal-reviewed

THE HOOK

"Every account you hold makes every rate better"

Customers already love the linked-boost story. The concept: for a six-week window, let qualifying boosts stack – hold two eligible checking accounts, get both boosts on your savings rate. Simple to say, easy to advertise, and it rewards our deepest relationships.

campaign window concept

2x

boosts stacked for multi-checking households

TBD

rate cost – needs treasury model

WHAT WE'D NEED

Asks and open questions

- ▶ **Rate operations:** can the platform apply two checking boosts to one savings account for a window, and what does the correction load look like after?
- ▶ **Product:** does stacking undercut the premium-tier story the deposit lineup is built on?
- ▶ **Treasury:** cost model for stacked boosts across the multi-checking base.
- ▶ **Legal:** disclosure language if selection rules are suspended for a window.

Reaction requested by 2025-09-19 so we can decide whether to carry this into Q4 planning.

NEXT STEPS

If there's appetite

- ▶ Concept review with Deposit Products and Rate Operations (async, this deck).
- ▶ Treasury cost model on the stacked-boost window.
- ▶ Creative exploration only after product sign-off.
